Hackathon Terms & Conditions (“Official Rules”) and Event Waiver

No purchase necessary to participate in this Hackathon. A purchase will not increase your chances of winning. Participation does not constitute an offer to buy Meta products or services. Void where prohibited by law.

Important: Please read these Official Rules, which are a contract, carefully. Without limitation, this contract includes indemnities to Organizers from you and a limitation of your rights and remedies. By participating, you agree to be bound by these Official Rules and represent that you satisfy all of the eligibility requirements.

All individuals interested in attending the Meta Global AI Developer Hackathon (the “Hackthon”) must complete, submit an application through the official application process, and be accepted. Applications must be submitted by October 25, 2026 at 11:59PM EST to be considered for participation in the virtual Hackathon – participation is virtual only. *Participation is limited to a maximum of 20,000 accepted applicants. Applications will be reviewed on a rolling basis as they're received. Once spots are filled, the application will close.* All fields in the event application form must be completed accurately and truthfully. Incomplete or false information may result in disqualification.

Submission of an application does not guarantee attendance at the Hackathon. The Organizers reserve the right to change or cancel the Hackathon at any time.

Event Overview

Participants build with Meta AI products, including Muse Spark, Glimmer, SAM 3, and any other Meta AI products identified on the Event page.

Participants selected to participate in the Hackathon will receive $150 in Meta Model API credits, valid for a 10-day

development window. Before claiming your credits, carefully review the Credit Terms.

Participants will submit their project to Cerebral Valley's portal at https://cerebralvalley.ai/e/meta-ai-developer-hackathon/hackathon/submit.

Finalists will be chosen by a panel of Organizers selected judges ("Judges"). The judges' selections are final and binding.

Hackathon Judging Criteria. These criteria apply only to projects submitted during the Hackathon, not to applications. Applications are reviewed as described in 'How Applications are Reviewed'. Hackathon Project submissions will be evaluated based on the following criteria: Impact (30%) — the real-world potential of the Project, who benefits, how much it matters, whether it could become something people use, and whether it fits one of the problem statements; Use of Meta AI Tooling (25%) — how creatively the team used Meta's AI tooling, whether they went beyond a basic integration, and whether they surfaced unexpected capabilities; Technical Depth & Execution (20%) — whether the engineering is sound and thoughtfully refined and the Project demonstrates real craft; and Demo (25%) — whether the Project has a working, impressive demo, whether the product holds up live, and the quality of the demo video.

There are two (2) tracks. A participant may apply for one (1) track only, and a project submission may be entered in one (1) track only. If participating in teams, each team must appoint one individual (the "Representative") to represent and act on behalf of the team and/or startup, including by entering the submission project. The Representative must meet the eligibility requirements for an individual Participant and must be duly authorized to submit on behalf of the team or startup. The Representative represents and warrants that: (i) they are duly authorized to act on behalf of the team or startup; and that (ii) each member of the team (or startup) has read the Hackathon Official Rules and agrees to abide by these Hackathon Official Rules.

- Indie Developer track. Open to individual builders and students, teams of up to four (4), subject to the eligibility requirements below. Each team's

Representative must submit the project on behalf of the team. The Representative shall identify all other team members in the project submission.

- Startup track. Open to technical founders building a product. The startup Representative must be an active employee of the startup and duly authorized designated individual to receive notices and prize payment on behalf of the startup.

If selected to participate in the Hackathon, finalists will receive prizes in U.S. dollars, at Organizer's sole discretion. Prizes are awarded only after eligibility verification and compliance with these Official Rules. These prizes may include:

- Indie Developer Track, total $400,000:
  - 1st Prize: $150,000
  - 2nd Prize: $100,000
  - 3rd Prize: $75,000
  - 4th Prize: $50,000
  - 5th Prize: $25,000
- Startup Track, total $550,000:
  - 1st Prize: $250,000
  - 2nd Prize: $150,000
  - 3rd Prize: $75,000
  - 4th Prize: $50,000
  - 5th Prize: $25,000

Bonus Prizes. The Organizers may award additional prizes of up to $50,000 in the aggregate for bonus awards recognizing standout projects or community achievements. Those categories may include, without limitation, a community vote award, most viral project award, or other unique or notable project categories designated by the Organizers. The number, categories, allocation, and value of individual bonus prizes may be determined by the Organizers before or during the judging

Event Waiver

Additional prizes do not reduce the track prizes above.

Total Prize Pool. The total anticipated prize pool for the Hackathon is $1,000,000 U.S. dollars.

In the case of a team or startup Prize, it will be the responsibility of the winning team's or startup's Representative to inform the Organizers in writing how to allocate the Prize amongst the team or to the startup, as the Representative deems it appropriate. In no event will the Organizers be responsible for determining the Prize allocation between teams, nor will the Organizers be liable for disputes among team members over Prize allocation.

Verification of Potential Winners: Each potential winner is subject to verification by Organizers, whose decisions are final and binding in all matters related to the Hackathon. A Participant is not a winner unless and until the Participant's eligibility has been verified and the Participant has been notified that verification is complete and no further action is needed. If Organizers determines in its discretion that a potential winner's participation in the Hackathon was prohibited or restricted by any applicable law rule, or regulation; or these Official Rules, such potential winner will be disqualified and an alternative potential winner may be selected, at Organizers' sole discretion, in accordance with the judging categories.

Liability & Information Release and Waiver Agreement

In consideration of being permitted to participate in the Hackathon organized by Cerebral Valley Enterprises, Inc. ("Cerebral Valley"), Meta Platforms, Inc. and/or its applicable affiliates ("Meta"), and their respective partners and affiliates involved in the Hackathon(collectively, the "Organizers"), the undersigned participant (the "Participant") agrees to the following terms and conditions:

Age Restrictions and Eligibility Requirements

Participants must be at least 18 years old to join the Hackathon and the age of majority in the applicant's jurisdiction of residence. The Organizers reserve the right to disqualify or remove a participant who does not meet the eligibility requirements or comply with these terms; the Organizers' decision regarding participation in the Hackathon is final.

Participants must also not be located in countries where local law prohibits participation or the receipt of an award. Void where prohibited by law. Individuals and/or Organizations that are (i) the target of any trade sanctions or export control restrictions administered or enforced by the U.S., EU, United Nations, or UK; (ii) acting on behalf of anyone else who is the target of such trade sanctions or export control restrictions; or (iii) organized or located in Belarus, China, Russia, Ukraine, Syria, or any country or region that is the target of comprehensive economic or financial sanctions (which are the Crimea, Donetsk, and Luhansk regions of Ukraine, Cuba, North Korea, Iran) are not eligible to participate. Employees, contractors, and interns of Meta and Cerebral Valley, government-affiliated individuals, and members of their immediate families (defined for these purposes as including spouse, domestic partner, parents, legal guardian, legal ward, children, and siblings and each of their respective spouses) and individuals living in the same household as such individuals, are not eligible.

Acknowledgment of Risk

The Participant understands and acknowledges that participation in a virtual Hackathon involves inherent risks, including but not limited to: interruptions or failures of internet connectivity, hardware, or software; security, privacy, or data breaches related to third-party platforms; loss of data, code, submissions, or work product; exposure to offensive, inappropriate, or unlawful conduct or content from other participants. The Participant voluntarily assumes all risks associated with participation in the Hackathon.

Release of Liability

To the fullest extent permitted by applicable law, the Participant, on behalf of themselves and their heirs, executors, families, estates, trustees, administrators, personal representatives, successors, and assigns, hereby releases, waives, and discharges the Organizers, their affiliates, and their respective officers, directors, employees, volunteers, contractors, sponsors, partners, agents, representatives, licensees, successors, and assigns (collectively, the “Released Parties”) for, from, and against any and all present and future

claims, liabilities, damages, losses, demands, actions, or causes of action arising out of or related to (a) the Participant's participation in the Hackathon, including but not limited to the use of online platforms, communications, Submissions, or interactions with other participants; or (b) the use of video, audio, or screenshots taken during the Hackathon (including your likeness incorporated therein), including claims of defamation, invasion of privacy, or rights of publicity or copyright infringement. This waiver and release does not extend to claims for gross negligence, willful misconduct, or any other liabilities that California law does not permit to be released by agreement.

Participant acknowledges and agrees that they have read and understood Section 1542 of the California Civil Code or any equivalent law of any other jurisdiction, which says, in substance: "A GENERAL RELEASE DOES NOT EXTEND TO CLAIMS THAT THE CREDITOR OR RELEASING PARTY DOES NOT KNOW OR SUSPECT TO EXIST IN HIS OR HER FAVOR AT THE TIME OF EXECUTING THE RELEASE AND THAT, IF KNOWN BY HIM OR HER, WOULD HAVE MATERIALLY AFFECTED HIS OR HER SETTLEMENT WITH THE DEBTOR OR RELEASE PARTY." Participant hereby expressly waives and relinquishes all rights and benefits under such section and any law of any jurisdiction of similar effect with respect to your release of any claims hereunder you may have against the Organizers.

To the maximum extent permitted by applicable law, Participant hereby covenants not to sue the Released Parties for any claims hereunder.

Indemnification

The Participant agrees to indemnify, defend, and hold harmless the Released Parties from and against any and all losses, liabilities, damages, costs, and expenses (including reasonable attorney's fees) resulting from any claim, action, or proceeding brought by any third party based on or arising out of the Participant's actions, conduct, participation, or other behavior of participants, in the Hackathon.

Governing Law and Venue

These terms shall be governed by and construed in accordance with the laws of the state of California, without regard to its conflict of law provisions. Any action or proceeding arising out of or related to this Agreement shall be brought exclusively in the state or federal courts located in San Francisco, California.

Release of Information

Organizers may include the name, logo, likeness, image, biographical information and/or statement(s) of the winning Participant(s) in any publications, press releases, or other public communications to factually describe the Hackathon and/or event without the Participant(s)' prior written consent, for publicity and marketing purposes worldwide and in all forms of media now known or hereafter devised in perpetuity, without advance notice to or compensation to said Participant(s).

The Participant agrees to allow personal information submitted to this event (including but not limited to name and email address), with event Organizers, sponsors, or other parties for marketing purposes related to products and services that may be of interest to the Participant. The Participant understands that they may receive communications from event Organizers, sponsors and affiliates after the Hackathon has concluded. Due to the nature of the Hackathon, none of the Organizers can agree to obligations of confidentiality, non-use or non-disclosure with regard to any of your content or any other ideas, information, feedback, pitches, developments or materials that you may provide, share, or use during or in connection with the event and/or Hackathon (your "Materials"). You agree that by providing, sharing, or using your Materials in connection with the event and/or Hackathon, your Materials will not be considered confidential or proprietary, and you grant the Organizers a royalty free, transferable, sub-licensable, worldwide and perpetual and irrevocable license to access, use, host, cache, store, reproduce, transmit, display, publish, distribute, and modify your Materials.

Image, Video and Audio Recording Consent

The Participant acknowledges that the Hackathon may be recorded, livestreamed, or otherwise captured via video, audio, screenshots, or other digital means. By participating in the Hackathon, the Participant consents to and gives the Organizers the right to store, reproduce, create derivative works of, publicly display, publicly perform, distribute, record and otherwise use their name, likeness, voice, image, chat messages, screen shares, and submissions in any media, worldwide, in perpetuity, for promotional, marketing, educational, archival, or any other lawful business purposes without compensation. All recordings shall be the sole property of the Organizers. The Participant waives any right to inspect or approve of the use of such video, audio, or screenshots in accordance with these terms and represent and warrant that they are authorized to grant the foregoing rights.

Hackathon Submission

As between the Hackathon Organizer and the entrant, the entrant retains ownership of all intellectual and industrial property rights (including moral rights) in and to the Submission. As a condition of submission, Entrant grants the Organizers, their subsidiaries, agents and partner companies, a perpetual, irrevocable, worldwide, royalty-free, and non-exclusive license to use, reproduce, adapt, modify, publish, distribute, publicly perform, create a derivative work from, publicly display, and otherwise exploit the Submission for any purpose without restriction, including, without limitation, for use in marketing materials (e.g., newsletters, social media, websites, and demonstration at live events).

By submitting a project to the event and/or Hackathon (a “Submission”), the Participant represents, warrants, and agrees that their Submission: (a) is their (or their applicable team’s or organization’s) original work product; (b) is solely owned by the Participant, their applicable team, or organization, with no other person or entity having any right or interest in it; and (c) does not violate the intellectual property or other proprietary rights (including copyright, trademark, patent, contract, or privacy rights) of any other person or entity. Participants may contract with a third party for technical assistance, provided the Submission components remain the Participant’s own work and the Participant owns all rights to

them. Participants may also include open source software or hardware, provided applicable open source licenses are followed and the Submission enhances or builds upon the underlying open source product.

General Payout Details

1. Who pays. Cerebral Valley administers prize distribution on behalf of the Organizers, including winner verification, tax forms and the transfer itself. The prize pool is funded by Meta.

2. Method and currency. Prizes are paid in USD, the currency the prize pool is funded in, so there is no currency conversion on our side. Distribution runs through a payout provider agreed between Meta and CV. CV currently uses Tremendous and will use its monetary (bank) payout options for this event. Winners enter their banking details directly with the provider; CV never receives or stores account numbers.

3. Preconditions. Before any payment we confirm the winner is an eligible participant, has signed the event waiver and Official Rules, and has submitted a W-9 if a US resident or a W-8BEN if not.

4. Winning teams. A team can take the prize as a single payment to its Representative, or split it among team members. We do not choose for them; the team tells us which and confirms it in writing before payout. The Official Rules already require each team to appoint a Representative who is authorized to act for the team, and state that the Organizers are not liable for disputes among team members over allocation.

5. Tax and fees. Winners are responsible for wiring and currency-exchange fees and for all applicable taxes, as the rules provide. We collect the applicable form and apply US withholding and reporting requirements where they apply. Non-US winners are responsible for their own banking compliance.

6. Timing. Payment is made within 30 days of our verifying the winner and receiving any documentation we require, per the contract. Funds are released once the prize money has been received from Meta.

Fees and Taxes

Winners (including any winning team members or winning organization), are responsible for any fees associated with receiving or using a Prize, including wiring, currency exchange, and all applicable federal, state and local taxes, territorial, provincial, prefectural, and/or other applicable taxes arising from participation in the Hackathon or the award of any Prizes as may be required by applicable tax authorities in the jurisdiction in which the winning Participant(s) is located. Winners may need to provide tax forms (e.g., W-9 for U.S. residents, W-8BEN for non-U.S. residents) or other documentation to comply with applicable withholding and reporting requirements. Winners are responsible for foreign exchange and banking compliance in their jurisdiction and for reporting the receipt of any Prize to relevant authorities. Organizers will not have liability with respect to any disputes that may arise among team or startups participants regarding the Prize allocation among the members of a winning team.

Code of Conduct and Right to Refuse Participation

Participants agree to conduct themselves in a professional, respectful, considerate, mindful, and inclusive manner in all virtual spaces associated with the Hackathon, including chat platforms, video calls, forums, and shared repositories.

The Organizers reserve the right, in their sole discretion, to suspend, remove, or disqualify any participant whose behavior is disruptive, abusive, discriminatory, demeaning, or otherwise inconsistent with the spirit of the Hackathon, without liability, including, without limitation, participants whose actions are meant to intimidate or engage in harassment.

Privacy Policy

Personal information may be collected during the event application process. By registering, participants consent to the collection, processing, and sharing of their personal information, including by and to Meta in accordance with its Privacy Policy, for purposes related to the Hackathon.

Modifications

The Organizers reserve the right to modify these terms at any time. Significant changes will be communicated to registered participants. By registering to attend the Hackathon, you acknowledge that you have read, understood, and agree to these terms.

Third-Party Platforms and Services

The Participant acknowledges that the Hackathon may rely on third-party platforms and services. The Organizers are not responsible for the availability, security, functionality, or policies of such platforms and disclaim all liability arising from the Participant's use of them.

Participant Acknowledgment of Third-Party Conduct

The Participant understands that the Organizers are not responsible for the actions, comments, or conduct of other participants, Judges, sponsors, or volunteers, and waive any claim against the Organizers arising from interactions with such parties during the Hackathon.

Waiver; Severability

No failure or delay in exercising any right under this Agreement will operate as a waiver, and no waiver shall be effective unless in writing signed by the waiving party. If any provision is held invalid or unenforceable, it will be severed and the remaining provisions will remain in full force and effect, with the severed provision enforced to the greatest extent permitted by applicable law.

Binding Effect

These terms shall be binding upon the Participant, and their respective heirs, executors, administrators, and assigns.

IN WITNESS WHEREOF, the Participant has executed this Hackathon Terms and Conditions and Event Waiver Agreement as of the date set forth below.

Date: October 25, 2026
